INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/008010

Re Item V.

Relevant prior art is provided by

- (A) DD 83869
- (B) EP 0024931
- (C) DE 3340026
- (D) Chemick zvesti chemical papers 1984, 38(5), 693-698

Novelty

Article 33(2) PCT appears to be satisfied: No herbicidal activity has been disclosed in (A)-(D) for any compound falling within the scope of formula (I) of claim 1 and thus claims 9 and 10. Claim 7 appears to be novel on account of the twelve provisos.

Inventive Step

(A) or (B) could be seen as the closest prior art, both disclosing benzotriazine derivatives which show the desired activity. The current compounds essentially differ from these on account of the annelated five-membered heterocycle. (C) relates to herbicidal compounds which contain a central fused triazinone-pyrrolidine ring system. However, the skilled person had no incentive to combine (A)/(B) with (C) and further modify the resulting tricyclic compounds in exactly such a way as to arrive at the current solution. Consequently, an inventive step in the sense of Article 33(3) PCT may be acknowledged for all compounds which actually solve the given problem.
